

Formal Notification of Unauthorized Account Access & SIM-Linked Breach

To: Google Legal Support / Google Account Security Division

From: Adrian MC

Email: adrianmartinezconol@gmail.com

Date: Wednesday, April 23, 2025

Subject: Request for Formal Account Review – Unauthorized Data Archive Request + SIM Identity Misuse

This letter is submitted to notify and request internal audit regarding unauthorized access to my Google account: adrianmartinezconol@gmail.com, which coincides with a broader identity and communication infrastructure breach via SIM

Key Events:

- Aug–Oct 2024: My mobile line (720-661-3747) was hijacked or spoofed, resulting in extreme data/call activity.
- Dec 28, 2024: Received taunting/verbal email via Verizon SMS Gateway – possibly surveillance-related.
- Jan 2, 2025: Received system-authenticated email from Google confirming my Google account archive was requested. I did not initiate that archive. This confirms unauthorized access to private data.

Attached:

- PDF Report: SIM Hijack Report + Exhibits (includes email metadata, screenshots, forensic patterns)
- Screenshots: Visual overlays of ChatGPT insight & emotion-spectrum analysis relevant to psychological strain and digital

Requests:

1. Conduct account login/device audit for Dec 15, 2024 – Jan 5, 2025
2. Identify IP/device used to request Google Takeout
3. Revoke non-authenticated sessions and tokens
4. Acknowledge breach formally for use in police/legal filing

This case includes mental, emotional, and technological harm to myself and my family, and I request urgent escalation.

Sincerely,

Adrian MC
